Power−FDR curves: estimated empirical init

Same datasets and fitting L = 5 | Points vary the PIP threshold | 1−3 true causal SNPs

mvSuSiE: diagonal
mvSuSiE: mash mixture
fSuSiE: default
mvSuSiE: canonical
mvSuSiE: oracle shape
fSuSiE: shuffled (IID)

50 replicate(s) per condition

Exact causal SNP identities; LD proxies count as false SNP discoveries. Dotted guide: FDR = 0.05.
